The RIM Wireless PC Card provides wireless connectivity to laptops, palmtops, PDAs and HPCs. The product is compatible with the BellSouth Wireless Data network and other Mobitex networks worldwide.

The RIM Wireless PC Card was one of several wireless devices tested by our Field Technicians. It scored very high in ease to configure, mount in the laptops and had a very fast response time. This is but one vendor we used in all of our outdoor tests.

OEM Radio-Modems

RIM's OEM radio-modems are high-performance RF transceivers designed for system integration by original equipment manufactures.

They are embedded within a broad range of products that require wireless connectivity, including handheld devices, laptops, point-of-sale terminals, bank machines, billboards and other displays, monitoring and metering equipment, vending machines, GPS systems and automobiles.

High Performance For OEMs

RIM's radio-modems meet the demands of engineers designing wireless data communication equipment that must have:

- An easy-to-use radio interface for rapid application development time
- A high-powered transmitter for effective indoor and fringe-area usage
- Immunity to EMI, for consistent reception and minimized shielding concerns
- Low power consumption to maximize operational life
- Small size and light weight design

Wireless Development Platform

RIM's OEM radio-modems provide a powerful wireless development platform that incorporate a high-performance digital transceiver, Intel386™ processor and ample memory for application code and file storage.

Powerful & Efficient Transmitter

The transmitter in RIM's radio-modems can supply a full 2 Watts to the antenna, enhancing in-building and fringe-area use. Plus, RIM's RF transceiver technology helps to ensure efficient power consumption.

Noise Immunity

RIM's radio-modems have high immunity to RF noise generated by nearby electronics, which significantly extends battery life, increases message exchange reliability, and increases the

Symbol MC 9000 Mobile Computer

Real-Time Mobile Computing Delivers Real Business Value

The MC 9000-G Series from Symbol Technologies is an elegant, ruggedized mobile computer for use in barcode scanning-intensive applications throughout your enterprise. The MC 9000-G gives your organization real-time access to mission-critical information from key points in your supply chain.

With a feature set that delivers superior data collection, communication and collaboration, the MC 9000-G facilitates faster decision-making and increased productivity in a variety of environments — from the factory to the warehouse to the sales floor.

Call for immediate assistance with the Symbol MC 9000.

| Environments | Applications | User |
|------------------------|--|---|
| Manufacturing | Inventory management Supply-line replenishment Safety testing Parts tracking Maintenance/repair operations Shop floor communications Compliance verification Receiving/putaway/shipping | Assembly-line personnel Shipping/receiving personnel Shift supervisors Repair depot personnel |
| Retail | Retail Warehouse management Price audits/changes Store receiving Inventory management Shrinkage control In-store communications | Sales associates Receiving-dock personnel Stock-room personnel Supervisors Merchandise managers Label printing staff |
| Wholesale Distribution | Warehouse management Returns processing EDI transactions Yard management | Warehouse personnel Loading-dock personnel Supervisors |
| Third-party Logistics | Warehouse management | Warehouse personnel |

(21)

An Unprecedented Integration of Flexibility, Performance

The MC 9000-G Series takes your supply chain management to a new level of efficiency with exciting and versatile features. It gives you dynamic functionality, including long- and short-range variable laser scanning for all popular 1D barcodes, plus the optional imager supports a growing number of 2D symbologies. Robust memory (up to 64MB) and a powerful highspeed processor ensure maximum user productivity. And the unique torque-cell construction delivers unmatched ruggedness to perform in the toughest environments and to protect your investment.

MS120 Pen Scanner

Scanning Features:

- Rugged, lightweight design.
- Easy to use and configure.
- Low power consumption.
- Wide read angle (0 - 45°).
- High scan speed (5 - 200 cm/sec).
- Durable, replaceable sapphire tip.
- Keyboard wedge and RS232 interfaces available.

The MS120 series bar code wands are targeted toward low reading volume and cost effective solutions. The advanced optics and electronic design convert bar code labels into a high quality digital signal. Able to read color, faded and low contrast barcodes quickly and accurately, the MS120 is a proven solution.

The polished sapphire tip reduces wear on labels and is also easily replaced if damaged. The MS120 is available with three different interfaces. The MS120A is an undecoded model which interfaces via a 9pin squeeze release connector. The MS120-2 has an RS232 interface with a built in decoder. With a key-board wedge (AT or PS/2) interface the MS120-3 also has a built-in decoder.

It's shape gives the MS120 the comfort and handling of a normal ink pen. Just sweep the tip of the wand across the bar code in either direction and listen for the "good read" beep that lets you know the data has been successfully captured. It doesn't get any easier than that.
